Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muller et al. (US 4,597,752) in view of Martin et al. (US 5,062,597).

Muller et al. disclose a continuous folding device comprising arm 102 which guides paper 4 in an accordion fashion upon a platform then creased by creasing mechanism 7; see figure 1. Arm 102 further comprises telescopic members 26 (main arm body) and 27 (sub arm body) for varying the length of the guiding member. Arm 102 is controlled with motor 18.

Muller et al. does not directly disclose horizontal or swinging of arm 102, however Martin et al. teach folding by swing arm 11. Furthermore, the table of Muller et al. does not move vertically nor has a detection mechanism for controlling vertical movement. However Martin et al. describe a vertically controlled table 47; see figure 1. Sensors 40 detect proper positioning of the stacked paper and control raising and lowering of the table according to preset values; see column 5, lines 55-68.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the teachings of Martin et al. in the invention of Muller et al. in order to manipulate the folds and the stacks.

Response to Arguments

3. Regarding claims 1 and 3-7, while features of an apparatus may be recited either structurally or functionally, claims directed towards an apparatus must be distinguished from the prior art in terms of structure rather than function. See *In re Schreiber*, 128 F.3d 1473-78, 44 USPQ2d 1429-32 (Fed.Cir. 1997) and *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed.Cir. 1990).

Allowable Subject Matter

4. Claim 2 is allowed.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R Harmon whose telephone number is 703-308-8643. The examiner can normally be reached on Monday-Thursday from 8-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 703-308-2187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
